When Kennicott ceased operation and the last train left in 1938, McCarthy slowly died. The flight in itself offers a spectacular flightseeing tour; this scenic route takes you by 3 active volcanoes, numerous salmon streams, glaciers, and other Alaskan sights. The Lake Clark Bear Viewing begins after a brief bear orientation aimed at group safety. You & your pilot will head out into this ideal bear habitat to watch these creatures interact with each other in the wild. The area is excellent for viewing the bears because of the layout and geography; it is a long stretch of grassland and beachfront. Watch as they frolic in the grass with their cubs, dig for clams, and take afternoon naps.

In July, lured by spawning salmon, as many as fifty bears can be seen at once along the 1.5-mile Brooks River. Katmai bear viewing at Brooks Falls is self-guided, but Katmai National Park Rangers provide an initial briefing upon arrival and are available for questions. An on-site wait list for the Lower River bear viewing platform may be implemented when visitation reaches capacity, to ensure quality bear viewing. We will drive and walk approximately 2-miles through the Conservation Center's trails as you get close enough to observe some of our favorite land animals such as moose, reindeer, bison, musk ox, and wolves. While we cannot guarantee bears due to the size of their habitat, it is common to see brown and black bears at the Conservation Center.
