Knik Glacier, born in the Pleistocene Glaciation period (the beginning of the Ice Age) 600,000 years ago, covered the Anchorage bowl and the entire Cook Inlet. Day Six

DENALI: Everything about Denali National Park is big: the scenery, the mountains, the incredible beauty, and the animals. Early this morning, you will embark on the Denali Park Tour, an excellent way to spot the wildlife for which Alaska is so famous: moose, bear, wolves, caribou, Dall sheep. It is a fascinating 6 to 8 hour motorcoach tour into the park. It is the only way to enter the park, as it is a preserve. A picnic lunch and beverage are provided. So bring your camera and binoculars. Mount McKinley National Park was

established in 1917 to protect its large mammals, not because of majestic Mt. McKinley. In 1980, the boundary was expanded to include both the Denali caribou herds wintering and calving ground and the entire Mt. McKinley massif. This more than tripled the size of the park, and was renamed Denali National Park and Preserve. It was also designated an International Biosphere Reserve significant for the potential for sub-arctic ecosystem research.

Denali is an Athabascan word meaning The High One. The mountain is officially named Mt. McKinley but is also referred to as Denali. Mt. McKinley is the highest peak in North America at 20,320 feet. It creates its own weather system and is often covered in clouds. Mt. McKinley is only visible about 1/3 of the time, so visitors to the park only have about a 30% chance of viewing Mt. McKinley. Denali is one of the greatest wildlife viewing areas in the world. Visitors have a chance of seeing grizzly bears, caribou, moose, Dall sheep, foxes, and wolves. Many smaller animals also inhabit the park such as arctic ground squirrels, hoary marmots, pikas, snowshoe hares, and beavers. For those interested in bird watching, there are a variety of birds that migrate to the park for the summer. The list includes arctic tern, American golden plover, long tailed jaegers, the surfbird, arctic warbler, the wheatear, willow ptarmigan, golden eagles, and ravens. Approximately 150 species live in and around the Denali area during the summer months. This evening, relax and enjoy your continued overnight accommodations near Denali National Park. **(B,L)**

Day Seven

FAIRBANKS: This morning enjoy a scenic drive to Fairbanks where we will send you off with a taste of the rich Alaskan culture that created our great state. Enjoy a tour of the University of Alaska Fairbanks museum and it's exhibits. It is acclaimed as one of the best with exhibits of Woolly Mammoth, Mastodons and ringed seals. They also have a section on the infamous Aurora Borealis (Northern Lights). The University of Alaska Museum of the North is a thriving visitor attraction, a vital component of the University of Alaska Fairbanks and the only research and teaching museum in Alaska.

The museum's research collections – 1.4 million artifacts and specimens – represent millions of years of biological diversity and thousands of years of cultural traditions in the North. The collections are organized into 10 disciplines (archaeology, birds, documentary film, earth sciences, ethnology/history, fine arts, fishes/marine invertebrates, insects, mammals, and plants) and serve as a valuable resource for research on climate change, genetics, contaminants and other issues facing Alaska and the circumpolar North. The museum is also the premier repository for artifacts and specimens collected on public lands in Alaska and a leader in northern natural and cultural history research.

As your 7-day adventure comes to a close with transfer to the airport, you'll have made memories that last a lifetime!. **(B)**
