DAY 1: ANCHORAGE & WASILLA: Today starts the first day of your Alaska Adventure by exploring the history of our state! Your guide will meet you out front of the lobby of one of our two pick-up points at 11:00 AM. You'll recognize our executive-mini coaches by the unique gold and black Alaska Adventure Unlimited branding. We will have a luggage trailer provided.

The Welcome House is a celebration of contemporary Alaska Native cultures while the outdoor facilities and sites allow the exploration of ancient tradition and the presentation of stories from the past. Upon leaving the Anchorage area, we will travel north to the Matanuska Valley, the farming belt of Alaska. Along the way, we will visit the native village of Eklutna. Hatcher Pass is a favorite of guests, for its beauty, wildflowers, berries and wildlife. The best photography here is in later summer when pass comes alive with changes in color!

KNIK GLACIER BOAT TOUR: Your adventure will take you aboard a river boat to Lake George, the base of Knik Glacier: one of Alaska's grandest natural attractions. Knik Glacier, born in the Pleistocene Glaciation period (the beginning of the Ice Age) 600,000 years ago, covered the Anchorage bowl and the entire Cook Inlet. While it remains active, with motion imperceptible to the naked eye, this glacier is in a constant state of change.

When Kennicott ceased operation and the last train left in 1938, McCarthy slowly died. The area is now home to approximately 25 - 30 year-round residents and has become a popular destination for many travelers from around the world. Lake Clark Bear Viewing - 6-8 Hour Bear Viewing: \$1,250 per person

Your Lake Clark National Park Bear Viewing Adventure begins when you depart Anchorage on a float plane and head south along the Cook Inlet. This ocean front setting is the ultimate bear habitat. The creek running through is loaded with Silver Salmon, attracting a resident Brown Bear population to the area all summer long. The flight in itself offers a spectacular flightseeing tour; this scenic route takes you by 3 active volcanoes, numerous salmon streams, glaciers, and other Alaskan sights. The Lake Clark Bear Viewing begins after a brief bear orientation aimed at group safety. You & your pilot will head out into this ideal bear habitat to watch these creatures interact with each other in the wild. The area is excellent for viewing the bears because of the layout and geography; it is a long stretch of grassland and beachfront. Watch as they frolic in the grass with their cubs, dig for clams, and take afternoon naps.

In July, lured by spawning salmon, as many as fifty bears can be seen at once along the 1.5-mile Brooks River. Katmai bear viewing at Brooks Falls is self-guided, but Katmai National Park Rangers provide an initial briefing upon arrival and are available for questions. An on-site wait list for the Lower River bear viewing platform may be implemented when visitation reaches capacity, to ensure quality bear viewing. OPTIONAL TOUR ADD-ON:

We will drive and walk approximately 2-miles through the Conservation Center's trails as you get close enough to observe some of our favorite land animals such as moose, reindeer, bison, musk ox, and wolves. While we cannot guarantee bears due to the size of their habitat, it is common to see brown and black bears at the Conservation Center. Make sure to take photos of wildlife with the amazing backdrop of the Chugach Mountains and Turnagain Arm.
